

Logistics System

Logistics System

Logistics System is a set of various services responsible for Supply chain.

Set of Services-

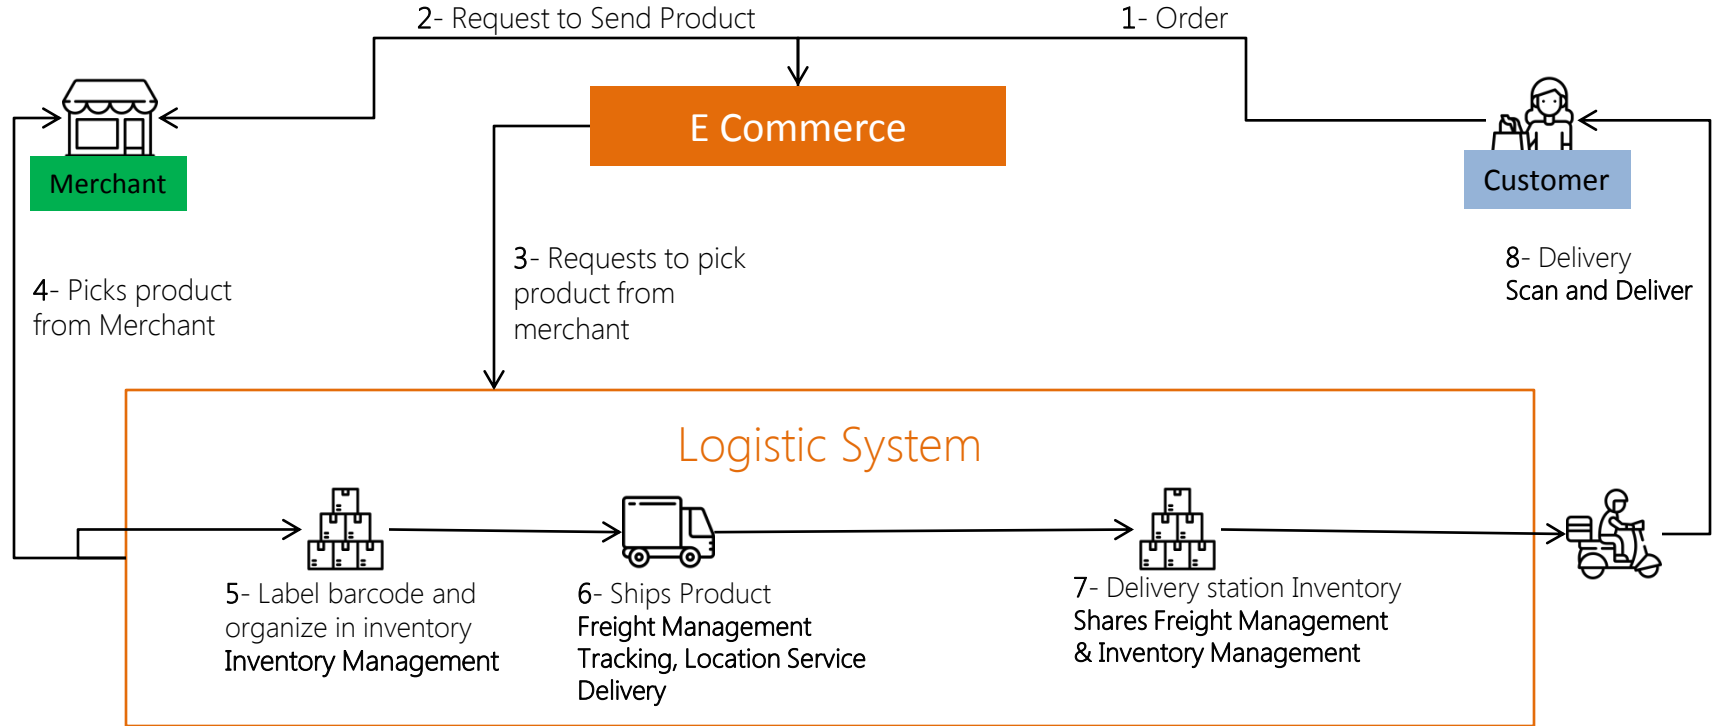

- Inventory Service
- Freight Service
- Delivery Service

Basically, it helps in movement of goods from one place to another and provides services to E-Commerce companies, Goods Supplier or Postal Service Providers

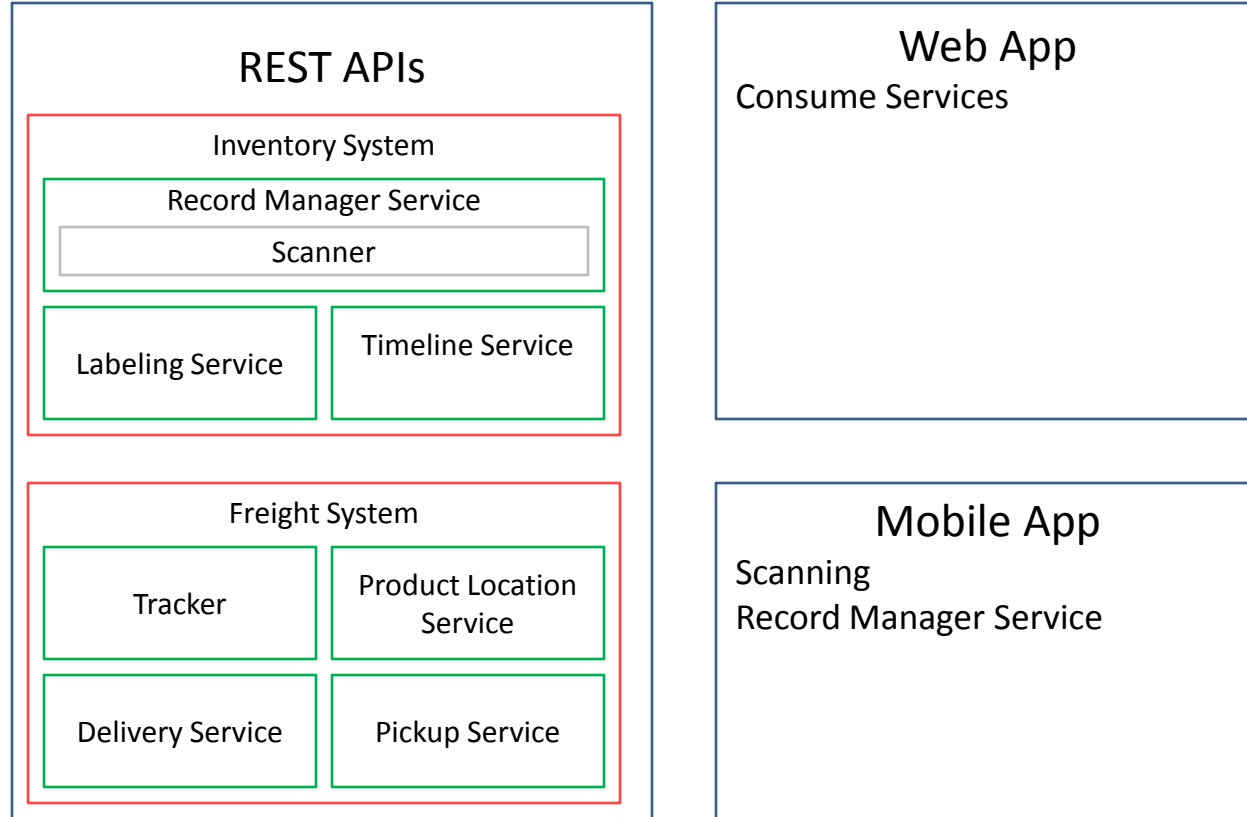

In either case, it can have multiple parties involved but the most prominent being-

- Receiver
- Sender
- Broker and Quality Benchmark

Logistic is Backbone of Ecommerce and Supplies
